### Francotyp-Postalia's Mailing Solution's High Volume Letter Openers... Noted for safety, speed and durability

**F**or a very high volume of incoming mail, you need a mail opener that's not just fast and reliable, but durable enough to handle the load. These high volume automatic letter openers from FP Mailing Solutions are tailor made for such a task. At speeds ranging from 32,000 to 40,000 and more per hour, these machines will simplify the chore of daily mail opening. Their ease of handling is enhanced by mill cutting technology. This provides safe cuts, leaving a feathered edge opening for easy access.

**M**ultiple motors and heavy duty construction provide the power, speed and durability you rely on. With the ability to open most types of envelopes, and any thickness up to 1/3" without sorting, these letter openers make fast work of most jobs. The addition of an optional counter, variable speed control and conveyer stacker can further extend their functionality. The clean design and high speed make FP's high volume letter openers productivity enhancements for any busy mailroom.
