

# FP Mail Center Manager™ (MCM)

**Mail Center Manager™ (MCM)** is powerful, yet easy-to-use software that can effectively manage your Mail Center or Shipping Department

**A**n anyone who is responsible for a company's mailing and shipping will tell you that working with multiple carriers is a challenge. Every carrier has different standards for labeling, tracking and shipping. In today's multi-tasked world, it is impossible to guarantee every employee will rate shop for the most cost-effective way to ship. And this can be costly. The Mail Center Manager is an effective accounting and shipping system that integrates weighing, rating, processing and accounting of all outbound mail and parcels in one seamless solution.

MCM puts everything you need to operate in one place. **C**ompatible with most Windows® software, it can electronically send shipping information to carriers from your PC, eliminating the need for multiple carrier supplied systems. It is easy to implement into your mailroom and offers comprehensive modules that also provide up-to-date shipping rules and regulations for all your international shipments. User-friendly yet sophisticated, FP's Mail Center Manager is the best postage accounting and shipping software on the market today.

# FP Mail Center Manager

## MCM Benefits

MCM can give you the control you need to manage your Mail Center or Shipping Department:

- Process outbound mail and parcels quickly and accurately.
- Value for your investment — no complex module-based pricing.
- UPS OnLine® and US Postal Service Delivery Signature Confirmation Certified.
- US Postal Service MAC Certified.
- Rate Shop among multiple carriers for the best mailing or shipping rate.
- Records all mail and parcels to a standard MSAccess-compatible database.
- Can electronically send shipping information to carriers.
- Produces Postal Accounting, Management Information, and Carrier Analysis. Performs automatic carrier performance analysis and reports.
- More than two hours of multi-media tutorials and learning help.
- Multiple systems can be easily networked together.
- SoftwareCare™ maintenance program keeps carrier rates and features up to date.
- Designed to run on Windows 95/98/ME/2000/NT.

## MCM Features:

**Multiple Carriers Supported** MCM supports multiple carriers and services including USPS, UPS, FedEx, FedEx Ground, DHL, Airborne, LTL and user programmable Custom Carriers.

**Multiple Systems Can Be Networked** Networking provides a central location for all data. This allows users to share account and customer databases. One report or manifest can show all users' activity.

**Microsoft Access® Database** All data is stored in Microsoft Access® database format, allowing for easy import and export of information.

**Interfaces with FP Postage Meter** The JetMail and M-Series can be connected to the MCM System providing an "all in one" tracking solution for your postage needs.

**Interfaces with MOS' Spectrum Scale** The Spectrum scale is available in many capacities and sizes.

**Unique Graphic User Interface** Increases operator efficiency and helps to eliminate operator errors. MCM can be operated from the keyboard, mouse, or a combination of both.

**Charges Back Postage to Accounts or Departments** Validates accounts before charges are allowed. Departmental budgets can be defined and tracked. The MCM can set up accounts using either the "identifiers" name or an account number, depending on the preference.

**Differential Weighing** Allows efficient weighing and posting of mixed mail or parcels.

**Password Protected** Allows assignment of individual passwords to users.

## MCM Options

MCM comes packed with features that address the vast majority of customers and most modules are standard.

The following options can be selected depending on your needs:

- Differential weight speeds up processing by reducing the time it takes to weigh an item.
- Meter interfaces connect MCM to various postage meters for greater speed and accuracy.
- Turnkey systems are available where your FP dealer installs and configures MCM on a Pentium-class computer.
- With internet access, MCM can track customers shipments.
- Automatic e-mail notification.
- Integrated users manual automatically updated with SoftwareCare™

Customer service is an important feature of every FP product. Whenever you have questions, we'll find the answers for you. It's part of what makes FP the right choice for your mailroom needs.
